

RÉSUMÉ

Marrone & Marrone specializes in fine, new residential construction and remodeling. We are familiar with many different architectural styles, and we have the experience and expertise to achieve consistency and quality faithful to a given style.

Notable recent projects:

- A new traditional home in Palo Alto, totaling some 10,000 square feet, including approximately 4,000 square feet of basement.
- A new 5,500-square-foot home in Los Altos Hills, done in a very contemporary style.
- A new 5,000-square-foot family-oriented rancho in the Santa Cruz Mountains, with pool, ponds, guest house and other outbuildings.
- A new 3,400-square-foot garage/office/gym/pool house structure with new pool and spa, in a classic Arts & Crafts style, integrated (on a second lot) with an existing home.

Notable projects:

- A new 6,000-square-foot home with intensive site development on Tevis Court (near Center) in Palo Alto. This house is a modern update of the classic Palo Alto Mediterranean style.
- A new 6,000-square-foot home on Coleridge in old Palo Alto, built in the style of the classic Mediterranean houses typical of that neighborhood.
- A new, European-inspired residence of nearly 10,000 square feet in Los Gatos. The site required extensive development.
- A new 6,000-square-foot Arts & Crafts home on Waverley in old Palo Alto, with detached garage.
- The addition to and remodeling of an older rambling ranch-style house in Portola Valley. The remodeled residence has many authentic elements from southern France, including antique roof tile, antique fireplaces and windows and doors true to the French Provençal style.
- A new 8,000-square-foot Colonial house on Flood Circle in Atherton with a large finished basement, three-car garage/workshop and a separate pool cabaña.
- A new three-level, 6,000-square-foot California Contemporary house in the Oakland Hills.

Experience – Greg Marrone
